ASBPA 2009 National Coastal Conference

Call for Presentations

The American Shore & Beach Preservation Association (ASBPA) announces the Call for Presentations for its 2009 national coastal conference at the Tradewinds Island Resort, St. Pete Beach, FL, October 14-16. ASBPA is the nation's first organization to promote science-based policies for the protection of beaches and shores.

The theme of the conference is *Integrating Coastal Science and Policy*. Presentations are invited on topics related to the ASBPA missions. Preference will be given to presentations that fit within one of the three conference tracks.

Submissions may be oral PowerPoint presentations, posters, or panels. **One page abstracts are due May 8, 2009.** Submit abstracts as a PDF or Word documents with a maximum file size of 1 MB to Abstracts@asbpa.org. Abstracts must include the name, affiliation, address, telephone number and e-mail address of the primary corresponding author and include a brief (100 word) biography of the presenter. All expenses are the responsibility of the presenter, including travel, lodging, and registration fees. Receipt will be confirmed within a week of submittal with notification of presentation status by June 12.

Shoreline Processes & Coastal Management

- Combining shoreline protection alternatives
- Modeling sediment transport and coastal processes
- Integrating beach, bluff, estuarine, and inlet processes into coastal policy
- Management of coastal inlets: Dredging and/or bypassing
- State-of-the-art of coastal structures
- Sand resources for beach nourishment

Federal, state and local coastal policy

- The process of federal funding: Congress, Administration, and U.S. Army Corps of Engineers
- Beaches as an economic engine
- ASBPA mission: Sustaining the federal partnership
- Integration of coastal science and policy for improved management
- Beach access & user groups
- Environmental issues

Global coastal issues

- Impacts of accelerating sea level rise
- Adaptation of coastal ecosystems
- International perspectives on coastal preservation
- Sustainable shorelines: Structural and non-structural solutions
- Effects of extreme storms on the coast
- Regulatory policy changes to adapt to climate change
